## EXPERIENCE

### Trainee Software Engineer – Python

Feb 2026 – June 2026

*Worktual Innovations*

*Chennai, TamilNadu*

- Monitored and validated 10K+ data samples for accuracy and consistency, ensuring data quality and pipeline readiness across development cycles — improving reporting efficiency by 40%.
- Supported cross-functional teams with dataset preprocessing and structured data preparation for 3+ AI model development cycles.
- Automated and improved reporting processes using Python & RESTAPI, increasing operational efficiency by 60%.
- Applied Machine Learning, Deep Learning, and Retrieval Augmented Generation (RAG) concepts to support LLM-powered AI solution development, including data preprocessing and feature engineering.
- Proposed and helped establish a dedicated Project Management practice within the team, improving task tracking, delivery timelines, and cross-functional coordination across ongoing AI initiatives.

## EDUCATION

### CHRIST (Deemed to be University)

Bangalore, Karnataka

*Master of Computer Applications*

*July 2024 – April 2026*

### St Joseph's University

Bangalore, Karnataka

*Bachelor of Computer Applications (Data Analytics)*

*August 2021 – April 2024*

## PROJECTS

### Voxpulse | *React, Firebase, NLP, TextBlob, RoBERTa, Plotly*

[Source Code](#) | [Demo](#)

- Led end-to-end implementation of a web-based analytics platform that collected and evaluated public opinion across 5K+ responses on multiple topics.
- Designed KPI-driven dashboards with demographic segmentation, enabling stakeholders to identify trends and anomalies across 4+ user segments — mirroring real business reporting workflows.
- Implemented NLP-based sentiment analysis and emotion tagging using Transformer-based models (RoBERTa) and TextBlob, achieving 88% classification accuracy — foundational experience applicable to LLM-based text understanding pipelines

### Christ X-Change | *Flutter, Firebase, Google Maps*

[Source Code](#) | [Demo](#)

- Developed a secure mobile marketplace app enabling students to buy and sell used goods, onboarding 100+ early users.
- Implemented student-verification workflows, increasing platform trust and reducing fraudulent listings by 90%.
- Integrated real-time chat and Firebase cloud storage for authentication and instant data sync across users.

### Encrypted Chat System | *C, Winsock, XOR Encryption*

[Source Code](#)

- Created a secure two-person chat system using XOR encryption with 100% encrypted message storage.
- Generated keys from username + text to encrypt/decrypt messages, blocking unauthorized access to chat history.
- Restricted chat history visibility to verified users only, focusing on secure data handling and compliance-driven system design.

## LEADERSHIP EXPERIENCE

### Head of Media & Design – Analytica 2023

Feb – Dec 2023

*Led an 8-member team for branding and digital outreach, ensuring timely delivery of 20+ event assets.*

### Event Head – Datagram 4.0

Nov 2022

*Managed event planning, execution checklists, and coordination for a team of 10+ under tight deadlines.*

## ACHIEVEMENTS AND CERTIFICATIONS

First Runner-up among 30+ teams in university-level exhibition Elixir 2023, conducted by St Joseph's University.

Completed 'Big Data Computing' course from NPTEL.

Completed certification courses on Cloud Computing and CyberSecurity from Infosys.

Completed a certification course on Cryptography from DataCamp.

## TECHNICAL SKILLS

**Programming Languages:** Python, SQL, R, C, Java

**AI/ML:** Machine Learning, Deep Learning, NLP, Transformers, RAG, LangChain, Hugging Face

**Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau

**Productivity Tools:** MS Word, Excel, PowerPoint, Google Docs, Sheets

**Web Technologies:** HTML5, CSS3, RESTful APIs

**Frameworks & Libraries:** React.js, Express.js, Next.js, Tailwind CSS

**Database & Cloud:** Firebase, MySQL, AWS
